Product Showcase

This month we are showcasing a popular product from Gyprock, Their Moisture and Mold plasterboard from the Gyprock Sensitive range. Thanks to improved building practices and insulation requirements for new homes and renovations, there is a lot less air 'leakage' than homes built years ago. This is great for thermal comfort and energy efficiency, however it can cause issues with moisture build-up that can promote the growth of mould and mildew.

Around 35% of Australian households have experienced mould which is not only unsightly but can have adverse health effects particularly on those who suffer from asthma or allergies. In response Gyprock® Sensitive is a moisture resistant plasterboard which has been developed with a gentle but powerful antifungal agent to resist mould growth. Gyprock Sensitive is ideal for use in wet areas such as bathrooms and laundries and rooms which may be subject to less air movement like bedrooms. Come and chat to our team on how you can use this product in your build.
